ONLINE COMPUTER GRAPHICS COURSE FOR YOUTH AGED 10–15

Find all important information on art supplies needed for Draw Place's **Online Computer Graphics Course for Youth Aged 10–15 below.**

A BRIEF LIST OF ART SUPPLIES REQUIRED FOR THE COURSE:

To get the intended experience, you will need the following equipment for the course:

A computer
Adobe Photoshop
Adobe Illustrator
A basic drawing tablet
2 monitors (e.g., a laptop with extra monitor)
Find more detailed information below:

SOFTWARE

The key thing you need for this course is a computer with working versions of **Adobe Photoshop and Adobe Illustrator.** It is best to have the **CC versions of Adobe software,** but any of the relatively new versions will suffice. **Make sure your computer is able to run both programs smoothly.**

A BASIC DRAWING TABLET

You will need a **basic drawing tablet.** Wired tablets like *Wacom Intuos S, XP Pen Deco Mini, Huion 610, etc.* or even older models will be more than enough. **Make sure to upgrade your drivers before the lesson,** download the latest version from the manufacturer's website, and restart your computer. **Testing the sensitivity in Photoshop is also a good idea.**

MONITORS

You will also need **2 monitors** for this course – one to work at and one to follow the live lesson. **Monitor size is not important, just make sure you do have two of them to get the intended experience and to be able to follow the teacher as you work.** And if you are serious about computer graphics, you will need two monitors anyway since it's a standard practice in the field.

You can use a **laptop with an extra monitor connected to it, or a desktop PC with two monitors.** Or you can work on a laptop and follow the live lesson on a desktop – it's really up to you. You can even use two laptops :) Getting a new basic monitor is not expensive, you can get one starting from 2000 CZK. Used **Full HD monitors** are even more cheap (starting from 1500 CZK) and borrowing a monitor from a friend is usually free :)
